Environmental Policy

Voltix Services Ltd is an exceptional Facilities Maintenance and Commercial Property Management Company with experience across a diverse range of sectors. We are committed to offering environmental services of the highest standards, because we understand the environment must be protected for the future. We take both our clients' and our own moral obligation seriously, which is why the Company also operates a waste minimisation programme across all services.

As such the Company is committed to:

- Compliance with ISO 14001:2015
- Limiting the use of resources, such as energy and raw materials.
- Continual evaluation of how our activities impact the environment and where improvements can be achieved.
- Wherever possible, waste that can be recycled will be disposed as such.
- Discussion with our clients regarding environmentally effective means of carrying out work on their behalf.
- Minimising the need for travelling by grouping visits to clients within the same area.
- Conducting as many project meetings as possible by means that do not involve travelling; such as, Skype calls, web conferencing, etc.
- Where travelling is essential to meet with clients, the use of public transport (rail, tube) will be preferential over private transport.
- Ensuring all operations are carried out with consideration for the environment foremost in consideration during planning stages.
- Compliance with current legislation and regulations whilst being mindful of future demands in national and international legislation.
- Encouraging education and provision of information for all our employees in the protection of the environment.

Objectives and targets for Voltix Services Ltd's commitment to environmental protection are reviewed annually, by the Health & Safety Manager, in accordance with Government targets and legislation.
